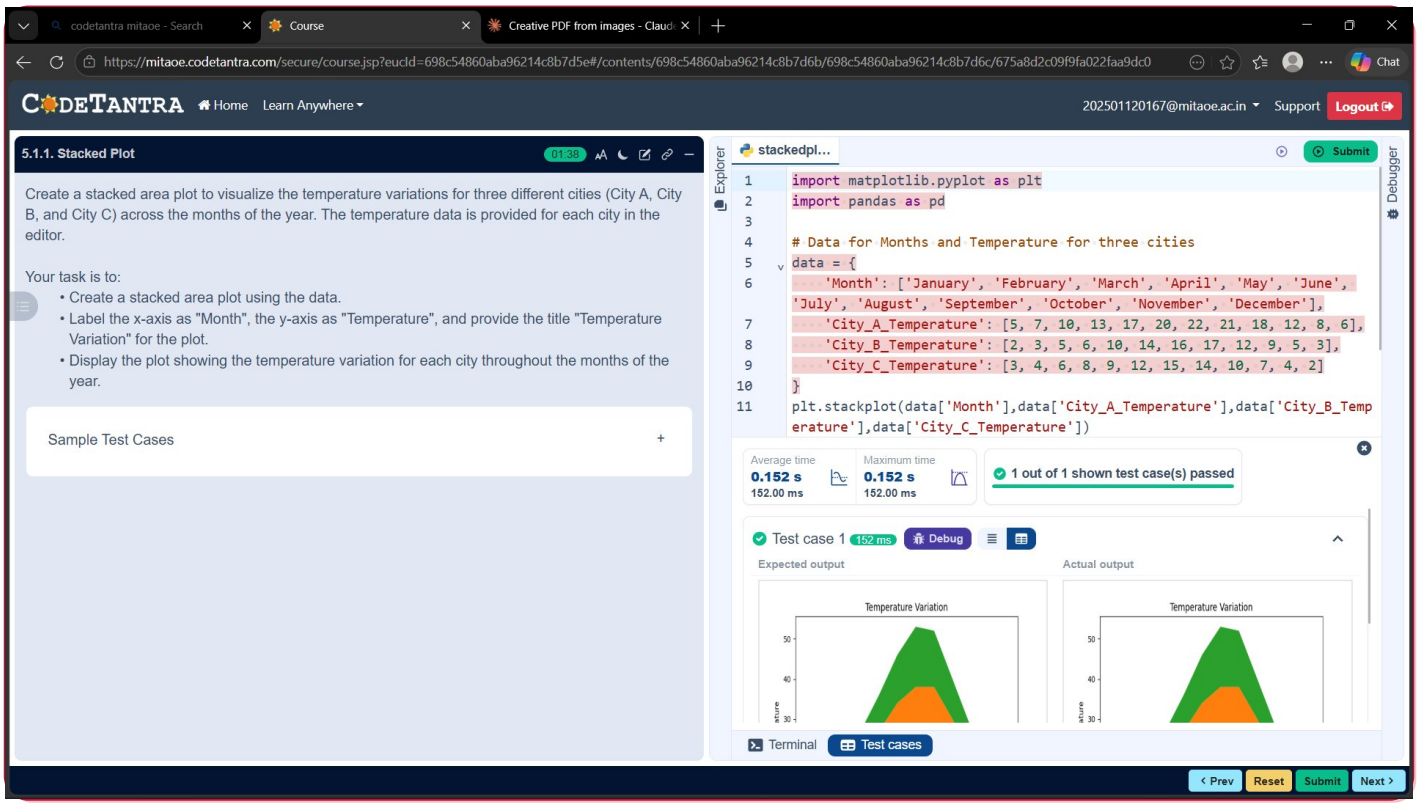
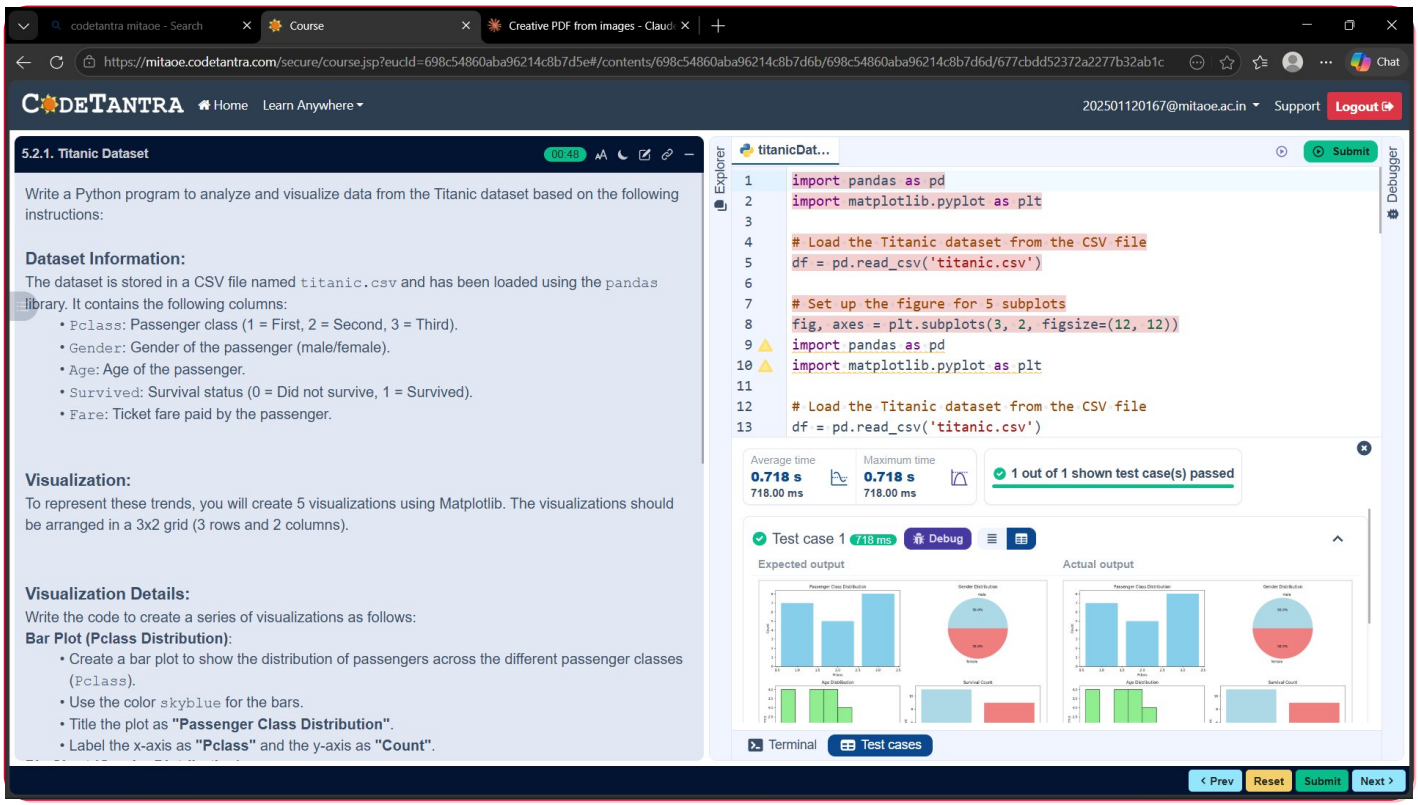
Creating a stacked area plot to visualize temperature variations for City A, B & C across months.

✓ All Tests Passed



5 subplots in a 3x2 grid: bar (Pclass), pie (Gender), age histogram, survival count, and more.

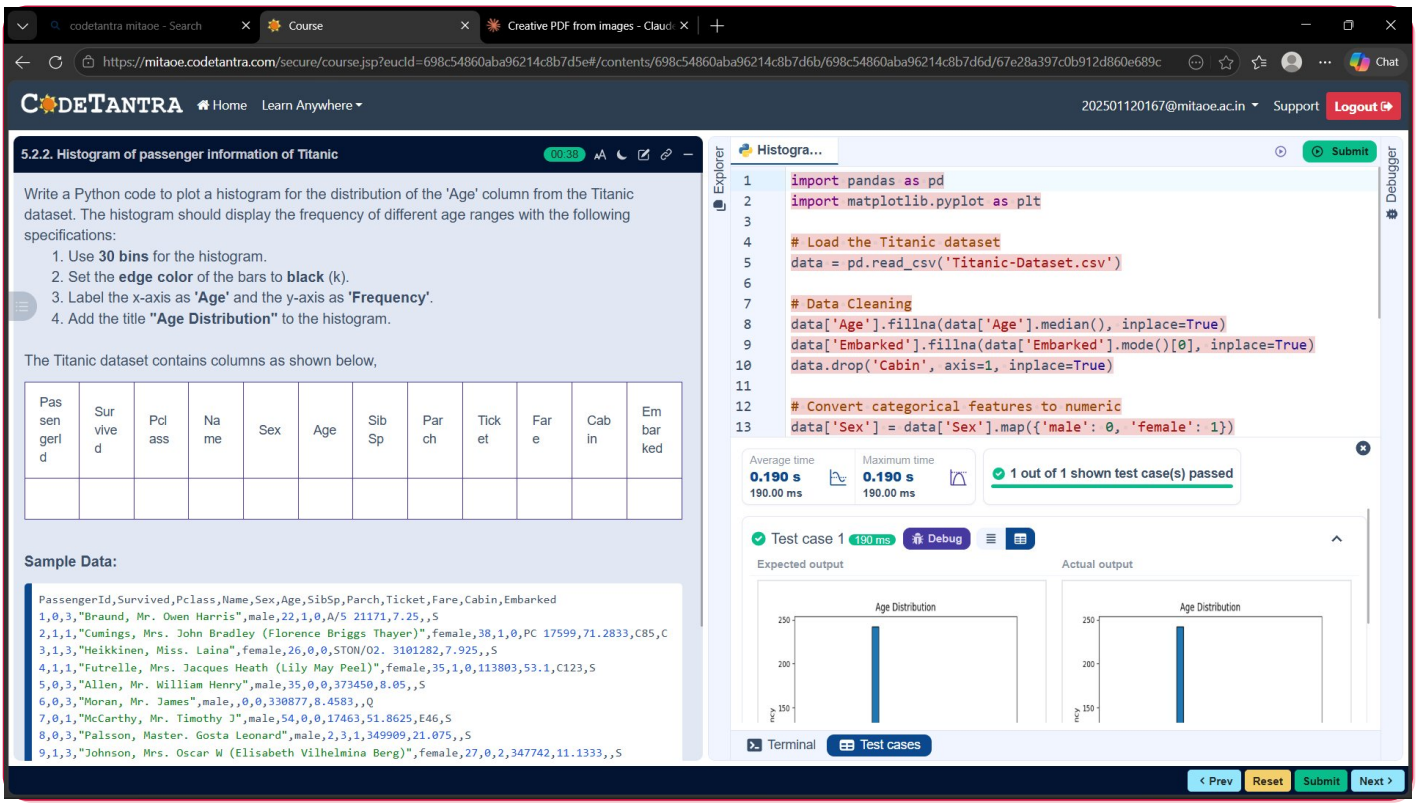
✓ All Tests Passed



Exercise 5.2.2 · Histogram of Passenger Age

Plotting a 30-bin histogram of the Titanic 'Age' column with black edges and frequency labels.

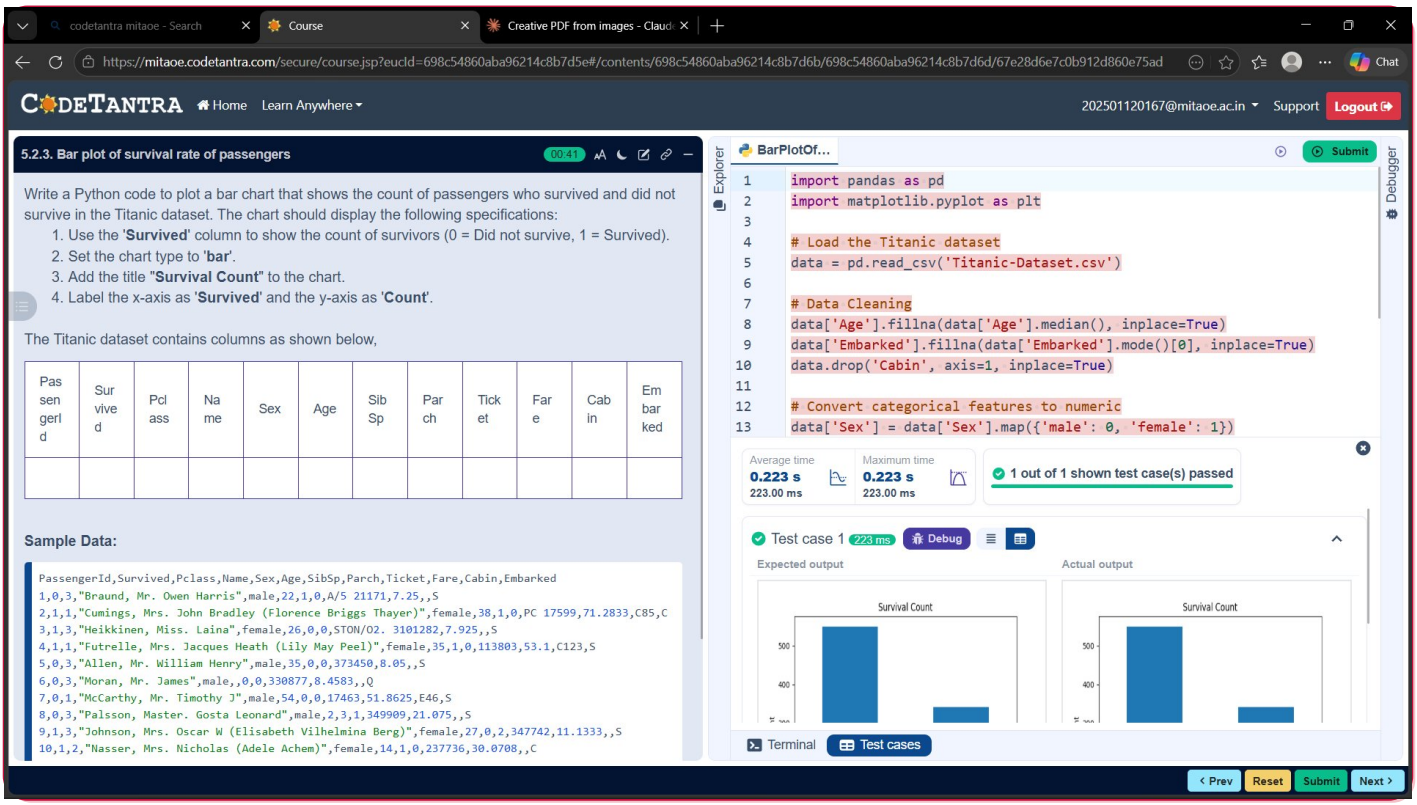
✓ All Tests Passed



Exercise 5.2.3 · Bar Plot of Survival Rate

Bar chart showing count of survivors vs non-survivors using the 'Survived' column.

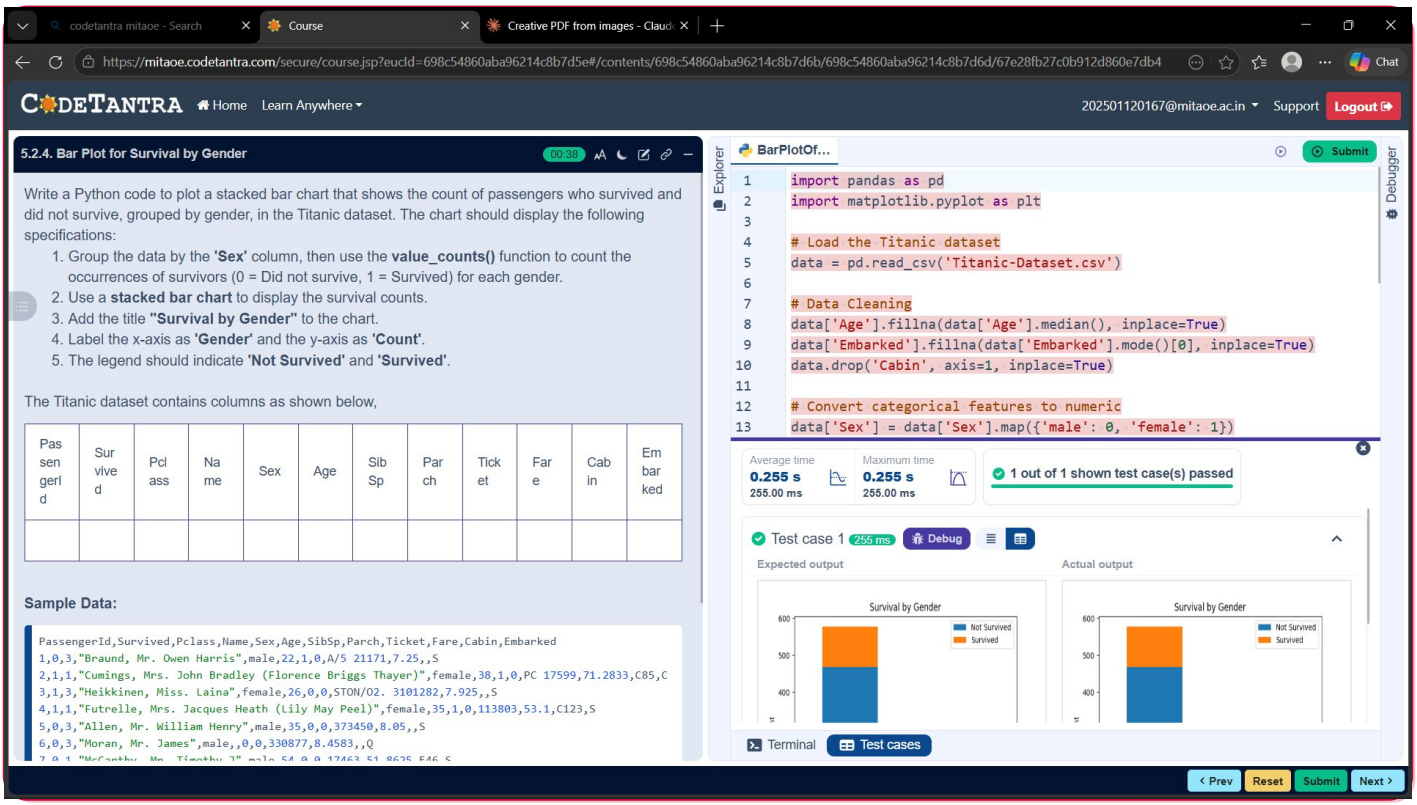
✓ All Tests Passed



Exercise 5.2.4 · Bar Plot for Survival by Gender

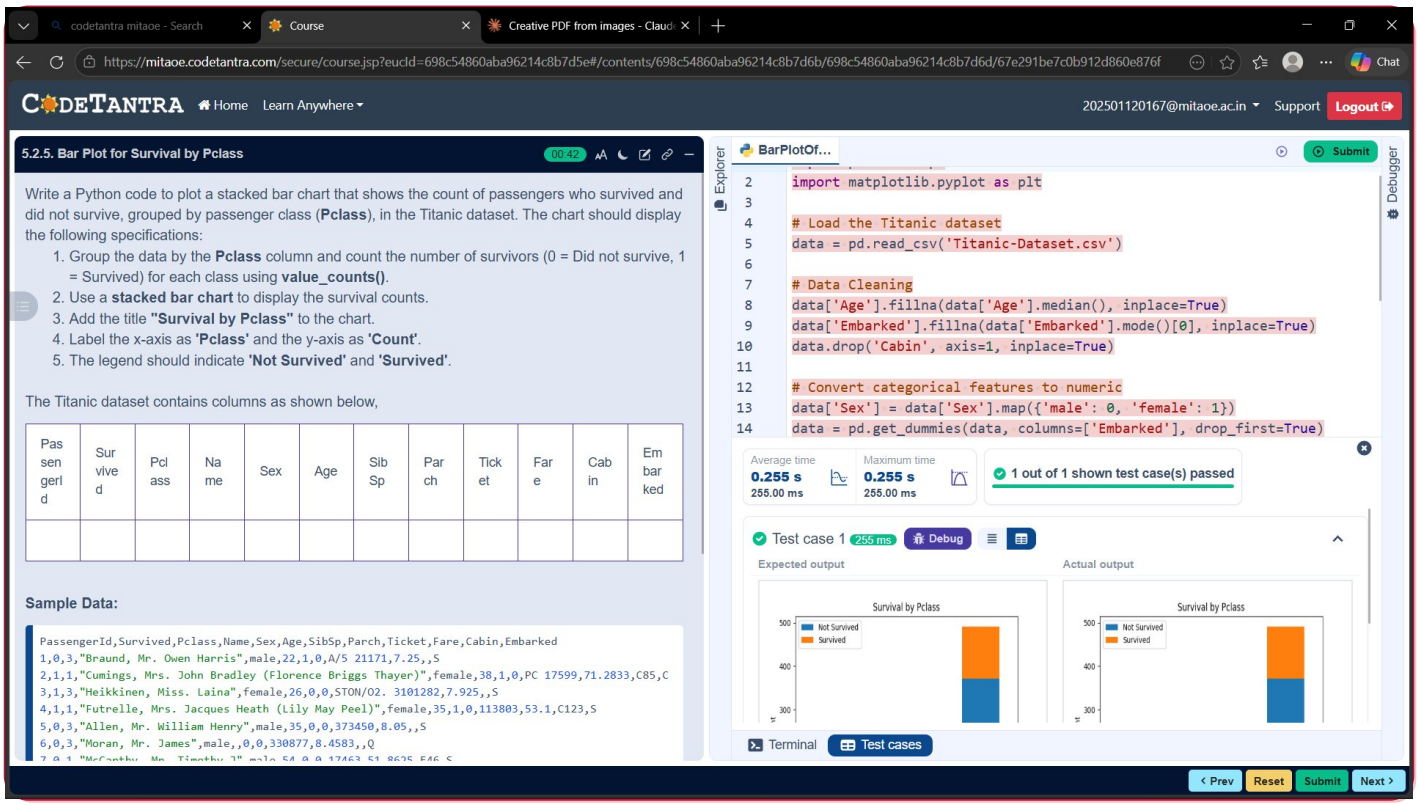
Stacked bar chart grouping passengers by Sex, showing survived vs not-survived counts.

✓ All Tests Passed



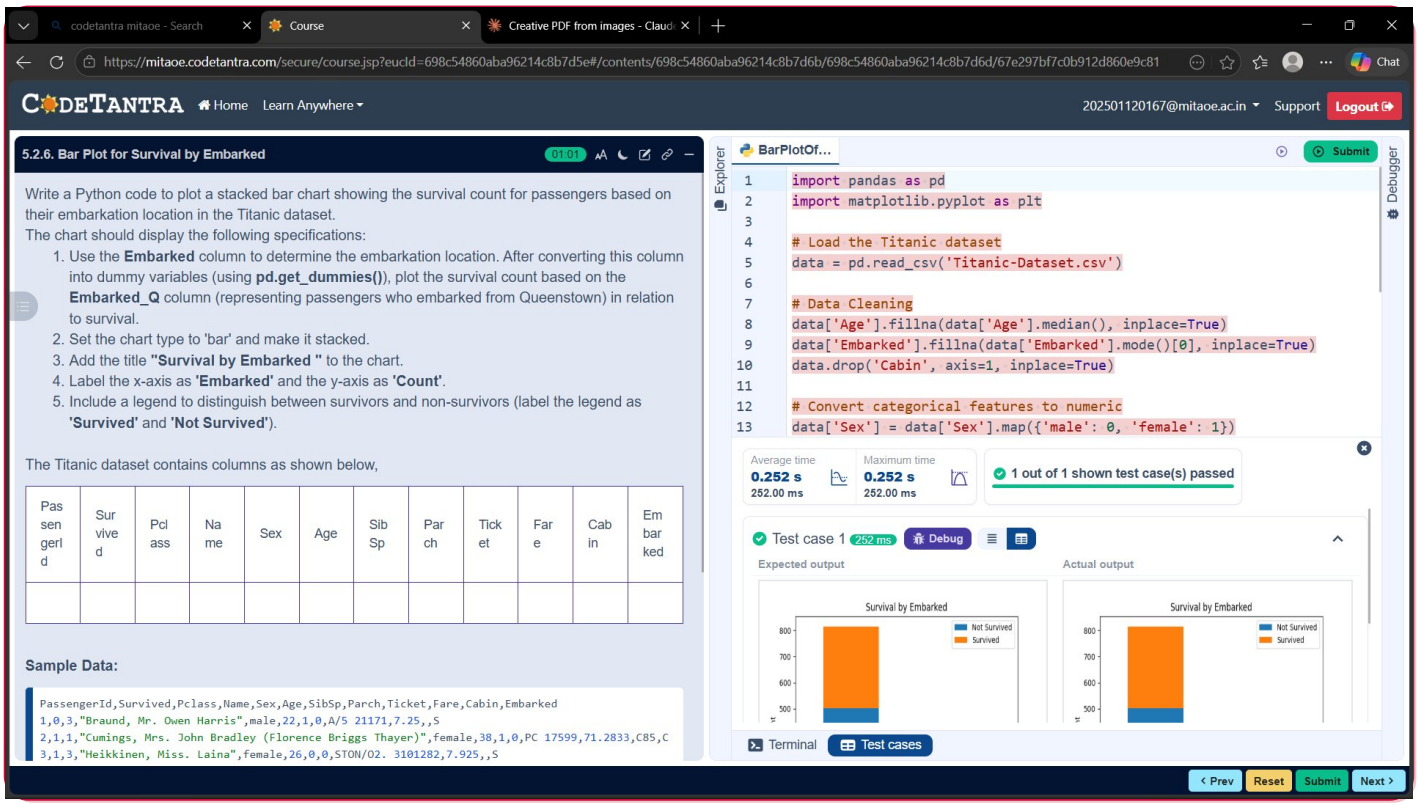
Stacked bar chart showing survival counts grouped by passenger class (Pclass).

✓ All Tests Passed



Stacked bar chart of survival counts based on embarkation location (Embarked_Q column).

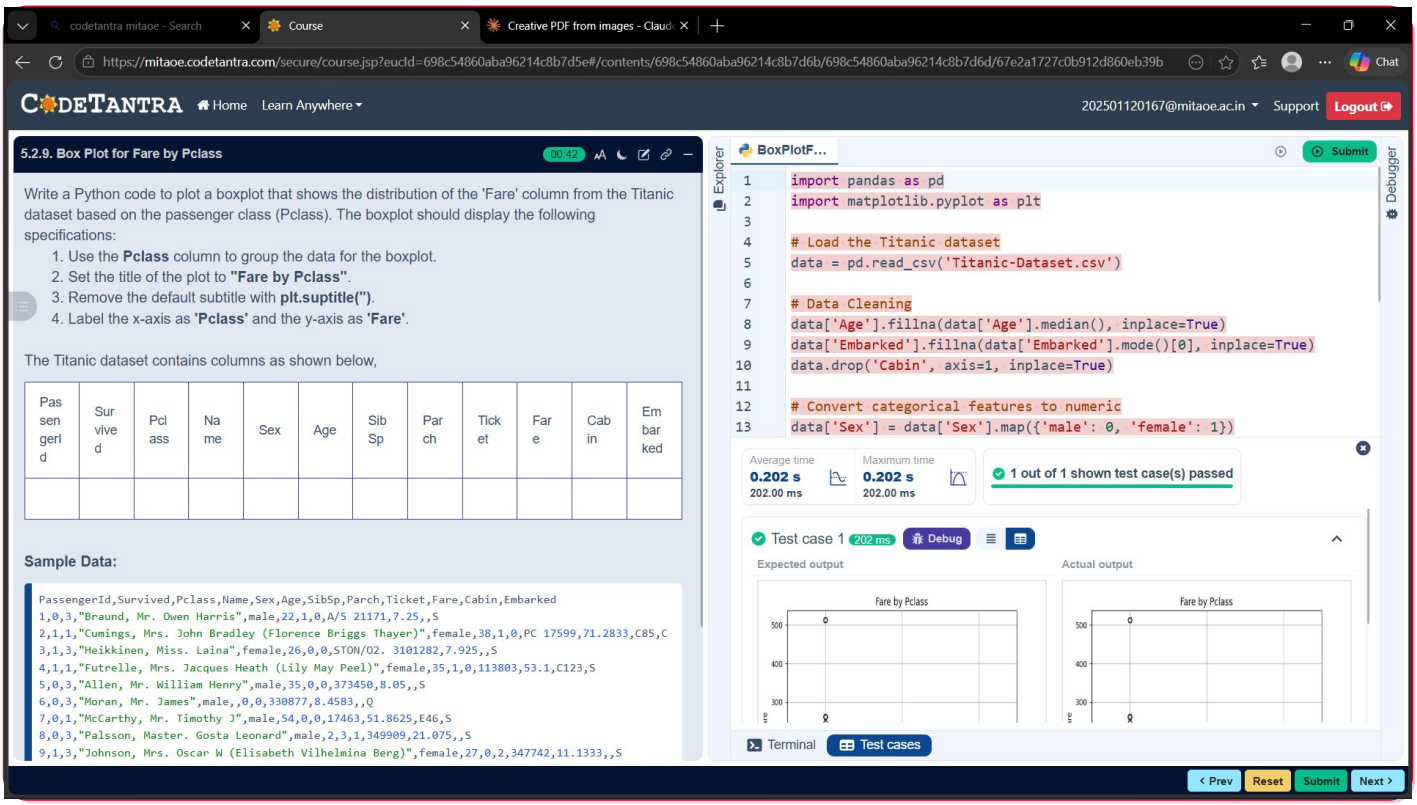
✓ All Tests Passed



Exercise 5.2.9 · Box Plot for Fare by Pclass

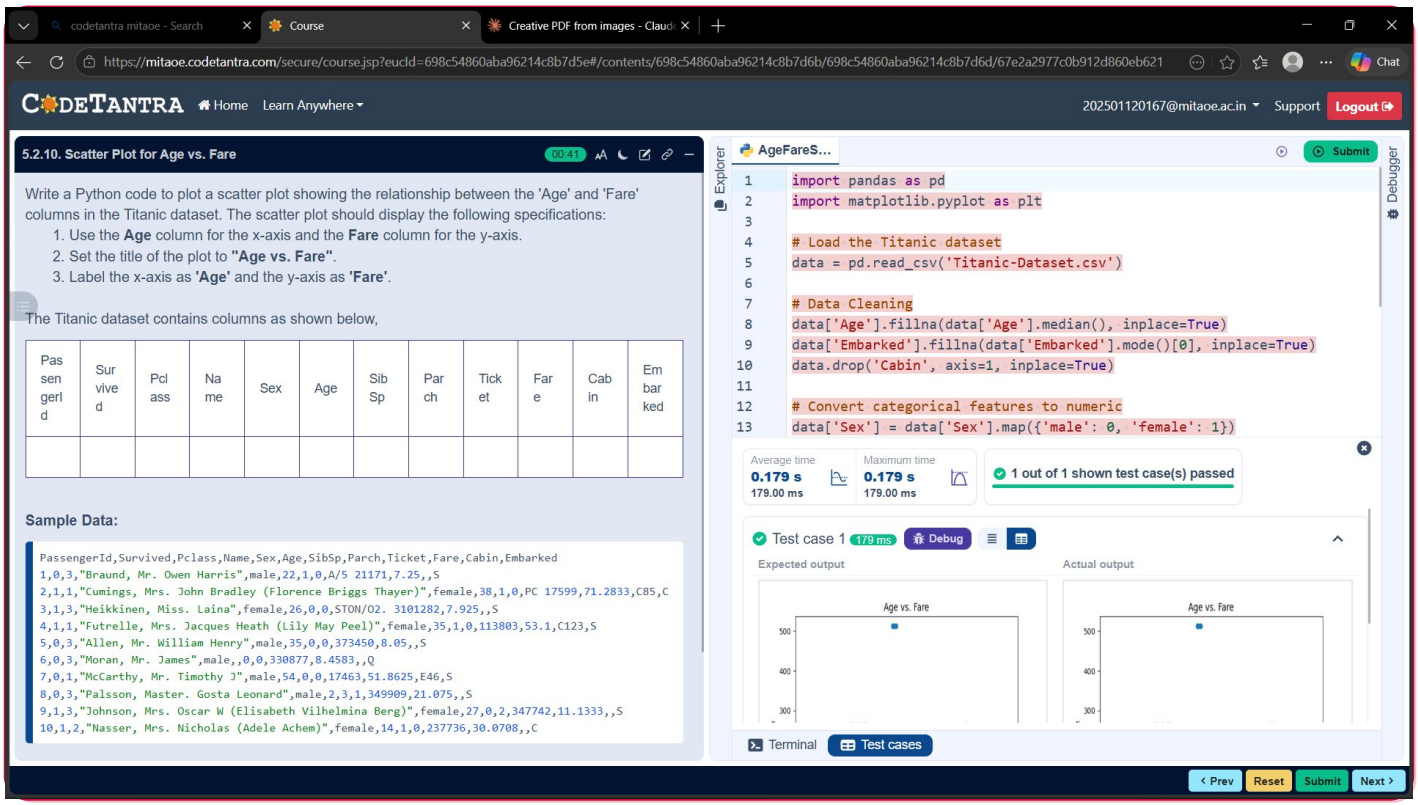
Boxplot showing fare distribution across passenger classes with Pclass on x-axis and Fare on y-axis.

✓ All Tests Passed

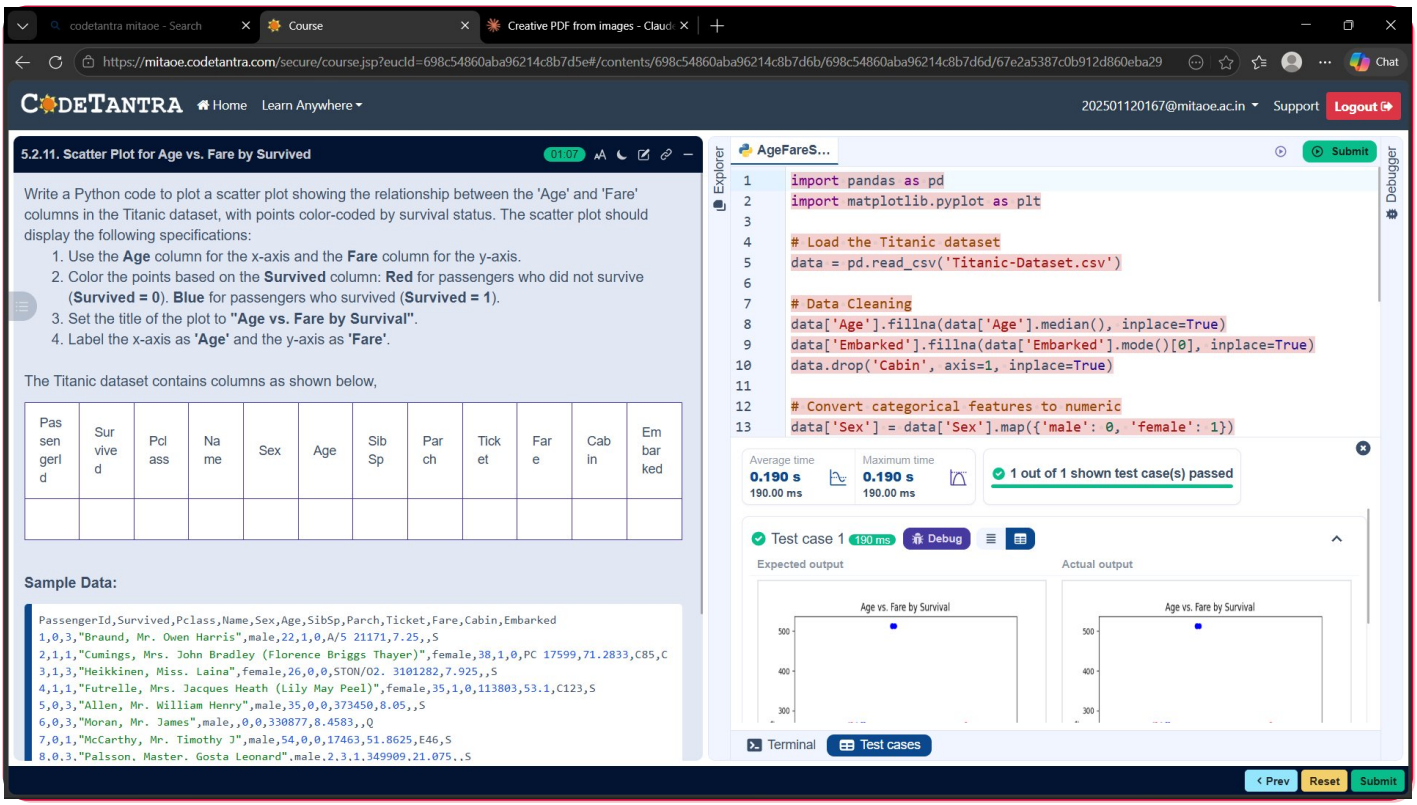


Scatter plot visualizing the relationship between passenger Age and Fare columns.

✓ All Tests Passed



Exercise 5.2.11 · Scatter Plot for Age vs. Fare by Survived

Scatter plot color-coded by survival: Red = did not survive, Blue = survived.


✓ All Tests Passed
